

Get Access to Market Values for Artists and Artworks

Why Art Auction Analytics:

Art Auction Analytics is a premium subscription product that provides market values and investment-style analytics of Post-War and Contemporary artists and artworks. Our market values provide pricing clarity via a consistent valuation source allowing you to make informed decisions.

Art Auction Analytics is designed to give you peace of mind:

- Save money by minimizing 3rd party costs;
- Access objective values and analytics in seconds;
- Expand and enhance art-related products and services; and
- Track and monitor risk exposure.

Art Auction Analytics allows you to better manage current and future fiduciary obligations.

What can it do:

Art Auction Analytics allows you to:

- Access market values for Post-War and Contemporary artists and artworks;
- Access Key Performance Indicators for artists including Demand, Volatility & Confidence, Correlation, Sales & Turnover, and Volume & Liquidity;
- Follow Artists; and
- Download information into pdf reports.

Art Auction Analytics gives you access to sophisticated analytics and outputs similar to existing products used for valuing other financial assets and securities.

Who is it for:

Art Auction Analytics was designed specifically for the institutional side of the art market, including:

- Insurance brokers & carriers who manage and insure art policies.
- Banks and lenders who lend against art.
- Wealth managers who provide art advisory services.
- Investor collectors who want to know what their art is worth.

We know you must treat art as a financial asset and have created the tools for you to do so.

How does it work:

Art Auction Analytics has an annual pricing model that includes a subscription fee plus a per seat license fee:

- Annual subscription fee: for unlimited access to the product.
- Annual per seat license fee: for up to three devices per person.

This pricing allows for unlimited access to our full database of market values and analytics.
